DeKalb IL Northern Field Office 815-787-5476

Illinois Department of Agriculture in cooperation with the US Forest Service's Slow the Spread Program have proposed treatment areas for spraying to control the Spongy Moth. Depending on weather, Splat GM-Organic Mating Disruptor, will be sprayed from yellow air tractors the week of June 16th

SPLAT GM-O is an organic, biodegradable formulation for the control of *L. dispar* using mating disruption. It is made entirely of food grade materials and has the consistency of hand cream. SPLAT GM-O uses pheromone, an effective and safe method to control *L. dispar* moth without impacting other insects, mammals or the surrounding environment.
